MINUTES
Approval of the Minutes: Trustee Cilek made a motion to approve the minutes of the March 27, 2012 meeting as written. Trustee Deal seconded the motion, which passed unanimously.
PORTFOLIO
Monthly Investment Report: Chief Investment Officer Bob Maynard presented the current status of the Fund and an overview of the private equity allocation and returns.

April has seen a pause in recent capital market advances, with equities down -2% to -2.5% for the month to date. Fixed income is up around 1%. As a result, the fund has lost -0.8% so far this month, dropping the fund to a positive 2% for the fiscal year to date and $12.086 billion.

In general, nagging continued concern about Europe (now led by doubts about Spain), slowing corporate earnings growth (Intel and IBM most recently disappointing), and uncertainty about the extent of the Chinese slowdown all have contributed to this month’s so far mixed results. On the other hand, current concerns do not seem to be as serious as those of late last year, with US economic recovery, at least, seeming to be broad based although tepid.

For the fiscal year to date, the major theme continues to be the severe disparity of performance between US equities (+5%) and international equities (-9%). This 14% difference particularly exacerbates the impact of global equity on our performance against our strategic policy benchmark, accounting for all of our -1.2% lagging of that policy. All of our global managers with the exception of Longview have lost money so far this fiscal year, with Bernstein "leading" with losses of over -10%. Our performance against peers, however, seems to be around median or slightly above.

Our two best returning accounts for the fiscal year are our REIT manager Adelante (12.5%), and our SSGA TIPS account (17.4%). They are also our two best performances against benchmarks Private assets are lagging slightly due to their natural delay in valuation changes.

Investment Manager Comments: The Investment Managers who were present shared their opinions and predictions for the current market situation.
