## Independent Auditor's Report

To the Retirement Board  
Firefighters' Retirement Fund  
Boise, Idaho

### Report on the Audit of the Schedule of Allocations and Schedule of Collective Pension Amounts

#### *Opinions*

We have audited the accompanying schedule of employer allocations of the Firefighters' Retirement Fund (the Fund) as of June 30, 2022 and related notes. We have also audited the totals for the columns titled net pension liability (asset), total deferred outflow of resources, total deferred inflow of resources, and total pension expense (expense offset) (specified column totals) included in the accompanying schedule of collective pension amounts (collectively the Schedules) of the Fund as of and for the year ended June 30, 2022.

In our opinion, the Schedules referred to above present fairly, in all material respects, the employer allocations and net pension liability (asset), total deferred outflow of resources, total deferred inflow of resources, and total pension expense (expense offset) for the Fund as of and for the year ended June 30, 2022, in accordance with accounting principles generally accepted in the United States of America.

#### *Basis for Opinions*

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Schedules section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### *Other Matters*

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Fund as of and for the year ended June 30, 2022, and our report thereon, dated October 12, 2022, expressed an unmodified opinion on those financial statements.

### ***Responsibilities of Management for the Schedules***

Management is responsible for the preparation and fair presentation of the Schedules in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the Schedules that is free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibilities for the Audit of the Schedules***

Our objectives are to obtain reasonable assurance about whether the Schedules as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the Schedules.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the Schedules, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the Schedules.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the Schedules.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

### ***Restriction on Use***

Our report is intended solely for the information and use of the Fund's management, the Fund Board, Fund employers and their auditors and is not intended to be and should not be used by anyone other than these specified parties.

A handwritten signature in black ink that reads "Eide Sully LLP". The signature is written in a cursive, flowing style.

\* Employer specific amounts are excluded from this schedule.

**Note 1 - Significant Accounting Policies**

Employer contributions to the Firefighters' Retirement Fund (the Fund) are calculated on creditable compensation for active members reported by employers. Employer contributions are accrued when paid and employers are statutorily required to pay a fixed percentage of compensation.

The Schedule of Collective Pension Amounts presents the deferred inflow of resources, deferred outflow of resources, pension expense (expense offset) and net pension asset at the Fund level. The Schedule of Employer Allocations (collectively, the Schedules) reflects employer contributions for fiscal year ending June 30, 2020, as there were no contributions during fiscal years ending June 30, 2021 and 2022. The June 30, 2020 continues to be a reasonable allocation method based on the activity of the Fund. The Schedule of Employer Allocations includes the following for each individual employer:

- Employer name.
- The amount of employer contributing entity's contributions for the period July 1, 2019 to June 30, 2020, (the prior fiscal year).
- The employer contributing entity's contributions as a percentage of total employer contributions, as defined by state statute.

The Schedule of Employer Allocations has been rounded and presenting the first nine decimal places.

**Basis of Accounting**

Contributions for employers and the net pension asset are recognized on an accrual basis of accounting.

**Use of Estimates in the Preparation of the Schedules**

The preparation of the Schedules in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain amounts and disclosures. Actual results could differ from those estimates.

**Components of Net Pension Asset**

The Fund's fiduciary net position is 184.72% of the Fund's total pension liability. Therefore, the Fund has a net pension asset. The components of the net pension asset of the Fund, for participating employers, as of June 30, 2022, are as follows:

Total pension liability	\$ 242,329,263
Fund fiduciary net position	<u>447,620,207</u>
Employers' net pension asset	<u><u>\$ (205,290,944)</u></u>
Fund fiduciary net position as a percentage of total pension liability	<u><u>184.72%</u></u>

The net pension asset is calculated using a discount rate of 6.35%, which is the expected rate of return on investments reduced by investment expenses. The net pension asset was determined by an actuarial valuation as of July 1, 2022, applied to all prior periods included in the measurement. Actuarial valuation involves estimates of the reported amounts and assumptions about the probability of occurrence of events far into the future. Amounts determined regarding the net pension asset are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Economic assumptions were studied in an experience study performed for the period 2015 through 2020. Demographic assumptions, including mortality were studied for the period 2011 through 2017.

**Actuarial Assumptions**

The following are the actuarial assumptions and the entry age normal cost method, applied to all periods included in the measurement:

Inflation	2.30 percent
Salary increases including inflation	3.05 percent*
Investment rate of return-net of investment fees	6.35 percent
Cost of Living (COLA) adjustments	**

\* 3.05 percent COLA is assumed for the gross benefit paid to members of FRF. A 1.00 percent COLA is assumed for PERSI benefit offsets used to determine the benefits paid by FRF.

\*\*There is an additional component of assumed salary grown (on top of the 3.05%) that varies for each individual member based on years of service.

Several different sets of mortality rates are used in the valuation for contributing members, members retired for service and beneficiaries. These rates were adopted for the valuation dated July 1, 2021.

**Contributing Members, Service Retirement Members, and Beneficiaries**

Fire & Police - Males	Pub-2010 Safety Tables, increased 21%.
Fire & Police - Females	Pub-2010 Safety Tables, increased 26%.
	5% of Fire and Police active member deaths are assumed to duty related. This assumption was adopted July 1,2021.
Disabled Members - Males	Pub-2010 Disabled Tables, increased 38%.
Disabled Members - Females	Pub-2010 Disabled Tables, increased 36%.

The long-term expected rate of return on pension plan investments was determined using the building block approach and a forward-looking model in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

## Firefighters' Retirement Fund

### Notes to Schedule of Employer Allocations and Collective Pension Amounts

June 30, 2022

Even though history provides a valuable perspective for setting the investment return assumption, we rely primarily on an approach which builds upon the latest capital market assumptions. The assumptions and the System's formal policy for asset allocation are shown below. The formal asset allocation policy is somewhat more conservative than the current allocation of PERSI's assets. The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Cash	0%	0.00%
Large cap	18%	4.50%
Small/Mid Cap	11%	4.70%
International Equity	15%	4.50%
Emerging Markets Equity	10%	4.90%
Domestic Fixed	20%	-0.25%
TIPS	10%	-0.30%
Real Estate	8%	3.75%
Private Equity	8%	6.00%

Discount rate – The discount rate used to measure the total pension asset was 6.35%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate. Based on these assumptions, the pension plans' net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term expected rate of return was determined net of pension plan investment expense but without reduction for pension plan administrative expense.

Sensitivity of the net pension asset to changes in the discount rate – The following presents the net pension asset of Fund employers calculated using the discount rate of 6.35% as well as what the employers' asset would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

	1% Decrease <u>(5.35%)</u>	Current Discount Rate (6.35%)	1% Increase <u>(7.35%)</u>
Employers' net pension asset	<u>\$ (183,840,119)</u>	<u>\$ (205,290,944)</u>	<u>\$ (223,918,693)</u>

#### Deferred Inflow of Resources and Deferred Outflow of Resources

Each employer will need to calculate two additional types of deferred outflows of resources and deferred inflows of resources which are employer specific amounts. These amounts relate the (1) net impact from changes in proportion (allocation percentage) between the periods; and (2) contributions made to the plan subsequent to the measurement date and before the end of the employer's reporting period.

### Plan Pension Expense (Expense Offset)

Plan pension expense (expense offset) consists of plan changes that are expensed immediately as well as amortizations relating to the difference between expected and actual experience, changes in actuary assumptions and differences between projected and actual investment earnings on pension plan investments. The following table provides the detail of the plan pension expense (expense offset):

Service costs and interest	\$ 14,749,137
Expected investment return	(31,997,482)
Contributions, expenses, and other items from actual operations	56,863
Fire premium tax	(2,901,920)
Amortization of difference between expected and actual experience	4,963,948
Amortization of net difference between projected and actual investment earnings on pension plan investments	<u>1,226,329</u>
 Plan Pension Expense (Expense Offset)	 <u><u>\$ (13,903,125)</u></u>

The amortization period is based on the remaining expected service lives of all employees that are provided with pensions through the System determined at the beginning of the measurement period. The amortization period was calculated at 1.0 years. The amortization of the net difference between projected and actual investment earnings on pension plan investments is amortized over a closed 5-year period inclusive of this fiscal year.

The amount reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense (expense offset) as follows:

2023	\$ 2,202,198
2024	3,108,274
2025	(471,258)
2026	16,013,070
