Report on Schedule of Allocations and Net Other Postemployment Benefit (OPEB) Amounts by Employer

We have audited the accompanying schedule of employer allocations of Public Employee Retirement System of Idaho Sick Leave Insurance Reserve Fund – State Members (the Fund) as of and for the year ended June 30, 2021, and related notes. We have also audited the totals for the columns titled net OPEB liability (asset), total deferred outflows of resources, total deferred inflow of resources and plan OPEB expense (expense offset) (specified column totals) included in the accompanying schedule of collective OPEB amounts (collectively the Schedules) of the Fund as of and for the year ended June 30, 2021, and related notes.

Management's Responsibility for the Schedules

Management is responsible for the preparation and fair presentation of the Schedules in accordance with accounting principles generally accepted in the United States of America; this includes design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the Schedules that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on the schedules of employer allocations and specified column totals included in the schedule of collective OPEB amounts based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedule of employer allocations and specified column totals included in the schedule of collective OPEB amounts are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the schedule of employer allocations and specified column totals included in the schedule of collective OPEB amounts. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the schedule of employer allocations and specified column totals included in the schedule of collective OPEB amounts, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the schedule of employer allocations and specified column totals included in the schedule of collective OPEB amounts in order to design audit procedures that are appropriate in the

circumstances, but not for the purpose of expressing an opinion on the effectiveness of Fund's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the schedule of employer allocations and specified column totals included in the schedule of collective OPEB amounts.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the Schedules referred to above present fairly, in all material respects, the employer allocations and net OPEB liability (asset), total deferred outflows of resources, total deferred inflow of resources, and plan OPEB expense (expense offset) for the Fund as of and for the year ended June 30, 2021, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of Public Employee Retirement System of Idaho (the System) as of and for the year ended June 30, 2021, and our report thereon, dated, October 28, 2021 expressed an unmodified opinion on those financial statements.

Restriction on Use

Our report is intended solely for the information and use of the Fund's management, the System's retirement board, Fund employers and their auditors and is not intended to be and should not be used by anyone other than these specified parties.

A handwritten signature in black ink that reads "Eric Sully LLP". The signature is written in a cursive, flowing style.

Note 1 - Significant Accounting Policies

The Public Employee Retirement System of Idaho Sick Leave Insurance Reserve Fund – State Members (the Fund) is administered by the Public Employee Retirement System of Idaho (the System). Employer contributions to the Fund are calculated on eligible compensation for active members reported by employers.

The Schedule of Collective OPEB Amounts presents the deferred inflow of resources, deferred outflow of resources, OPEB expense (expense offset) and net OPEB liability (asset) at the Fund level. The Schedule of Employer Allocations (collectively, the Schedules) reflects employer contributions for fiscal year ending June 30, 2020, as there were no contributions during fiscal year ending June 30, 2021. The June 30, 2020 continues to be a reasonable allocation method based on the activity of the Fund. The Schedule of Employer Allocations includes the following for each individual employer:

- Employer name.
- The amount of employer contributing entity's contributions for the period July 1, 2019 to June 30, 2020,(the prior fiscal year).
- The employer contributing entity's contributions as a percentage of total employer contributions, as defined by state statute.

The Schedule of Employer Allocations has been rounded and presenting the first nine decimal places.

Basis of Accounting

Contributions for employers and the net OPEB liability (asset) are recognized on an accrual basis of accounting.

Use of Estimates in the Preparation of the Schedules

The preparation of the Schedules in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain amounts and disclosures. Actual results could differ from those estimates.

Public Employee Retirement System of Idaho Sick Leave Insurance Reserve Fund– State
Members
Notes to Schedule of Employer Allocations and Collective OPEB Amounts
June 30, 2021

Components of Net OPEB Liability (Asset)

The components of the net OPEB liability (asset) of the Fund, for participating employers, as of June 30, 2021 are as follows:

Total OPEB liability	\$ 104,239,022
Fund fiduciary net position	<u>286,193,340</u>
Employers' net OPEB liability (asset)	<u>\$ (181,954,318)</u>
Fund fiduciary net position as a percentage of total OPEB asset	<u>274.55%</u>

The net OPEB liability (asset) is calculated using a discount rate of 5.45%, which is the expected rate of return on investments reduced by investment expenses. The OPEB total was determined by an actuarial valuation as of July 1, 2021. Actuarial valuation involves estimates of the reported amounts and assumptions about the probability of occurrence of events far into the future. Amounts determined regarding the OPEB total are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Actuarial Assumptions

The following are the actuarial assumptions and the entry age normal cost method, applied to all periods included in the measurement:

Inflation	2.30 percent
Salary increases including inflation	3.05 percent
Investment rate of return**	5.45 percent
Health care trend rate	N/A*

* Health care trend rate is not applicable as the benefit is based on the unused sick leave hours at retirement, and is calculated as a fixed dollar amount that can be applied to premiums.

The long-term expected rate of return on OPEB Fund investments was determined using the building block approach and a forward-looking model in which best estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Even though history provides a valuable perspective for setting the investment return assumption, the approach used builds upon the latest capital market assumptions. The assumptions and the System’s formal policy for asset allocation are shown below. The formal asset allocation policy is more conservative than the current allocation of the System’s assets. The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation.

Capital Market Assumptions from Callan 2021

Asset Class	Target Allocation	Long-Term Expected Nominal Rate of Return (Arithmetic)	Long-Term Expected Real Rate of Return (Arithmetic)
Fixed Income	50.00%	1.80%	(.20)%
US/Global Equity	39.30%	8.00%	6.00%
International Equity	10.70%	8.25%	6.25%
Assumed Inflation - Mean		2.00%	2.00%
Assumed Inflation - Standard Deviation		1.50%	1.50%
Portfolio Arithmetic Mean Return		6.18%	4.18%
Portfolio Standard Deviation		12.29%	12.29%
Portfolio Long-Term (Geometric) Expected Rate of Return		5.55%	3.46%
Assumed Investment Expenses		0.40%	0.40%
Portfolio Long-Term (Geometric) Expected Rate of Return, Net of Investment Expenses		5.15%	3.06%

Investment Policy Assumptions from PERSI November 2019

Portfolio Long-Term Expected Real Rate of Return, Net of Investment Expenses	4.14%
Portfolio Standard Deviation	14.16%

Economic/Demographic Assumptions from Milliman 2021

Valuation Assumptions Chosen by PERSI Board

Long-Term Expected Real Rate of Return, Net of Investment Expenses	3.15%
Assumed Inflation	2.30%
Long-Term Expected Geometric Rate of Return, Net of Investment Expenses	5.45%

Discount rate – The discount rate used to measure the total OPEB liability was 5.45%. The projection of cash flows used to determine the discount rate assumed that contributions from Fund employers will be made at the current contribution rate. Based on these assumptions, the Fund’s net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on Fund investments was applied to all periods of projected benefit payments to determine the total OPEB liability. The long-term expected rate of return was determined net of OPEB plan investment expense but without reduction for OPEB plan administrative expense.

Public Employee Retirement System of Idaho Sick Leave Insurance Reserve Fund– State
Members

Notes to Schedule of Employer Allocations and Collective OPEB Amounts
June 30, 2021

Sensitivity of the net OPEB liability (asset) to changes in the discount rate – The following presents the net OPEB liability (asset) of the Fund’s employers calculated using the discount rate of 5.45% as well as what the employer’s liability (asset) would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

	1% Decrease (4.45%)	Current Discount Rate (5.45%)	1% Increase (6.45%)
Employer's net OPEB liability (asset)	<u>\$ (174,462,603)</u>	<u>\$ (181,954,318)</u>	<u>\$ (188,820,584)</u>

Deferred Inflow of Resources and Deferred Outflow of Resources

Each employer will need to calculate two additional types of deferred outflows of resources and deferred inflows of resources which are employer specific amounts. These amounts relate the (1) net impact from changes in proportion (allocation percentage) between the periods; and (2) contributions made to the plan subsequent to the measurement date and before the end of the employer’s reporting period.

Plan OPEB Expense (Expense Offset)

Plan OPEB expense (expense offset) consists of changes that are expensed immediately. The following table provides the detail of the plan OPEB expense (expense offset):

Service costs and interest	\$ 10,333,684
Expected investment return	(16,350,877)
Expenses and other items from actual operations	47,914
Amortization of difference between expected and actual experience	(1,354,202)
Amortization of changes of assumptions	(192,820)
Amortization of net difference between projected and actual investment earnings on OPEB investments	<u>(7,929,752)</u>
Plan OPEB expense (expense offset)	<u>\$ (15,446,053)</u>

The amortization period is based on the remaining expected service lives of all employees that are provided with OPEB through the System determined at the beginning of the measurement period. The amortization period was calculated at 7.7 years. The amortization of the net difference between projected and actual investment earnings on OPEB plan investments is amortized over a closed 5-year period inclusive of this fiscal year.

Public Employee Retirement System of Idaho Sick Leave Insurance Reserve Fund– State
