## **OUTDATED INFORMATION USED FOR NBC NEWS REPORT Boise, Idaho - July 26, 2013**

On July 22, 2013, the NBC Nightly News cited Idaho as being among the states whose pension (PERSI) funding was below the 80% solid performance threshold set by the PEW Research Center. The information reported by NBC was outdated. During the 2008-2009 recession, along with nearly every pension system nationwide, PERSI's funding level did fall to 79%, just one-percent under the solid performance threshold. **As of today, PERSI has a healthy and solid 89.2% funding level.**
